

**Sample Number:** DI020309-1-2

**Sample ID:** Sample #2

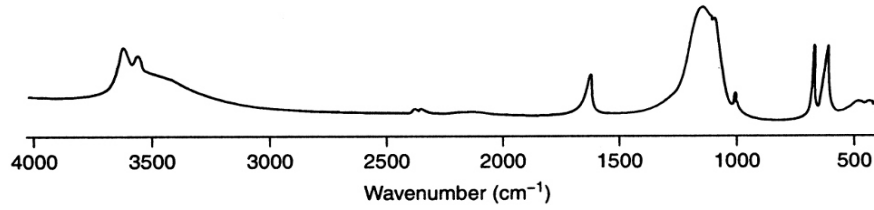

**Results:** **Incongruent** The FTIR spectrum of the sample lacks one or more spectral characteristics and/or peaks identified in contaminated Chinese drywall reference materials.

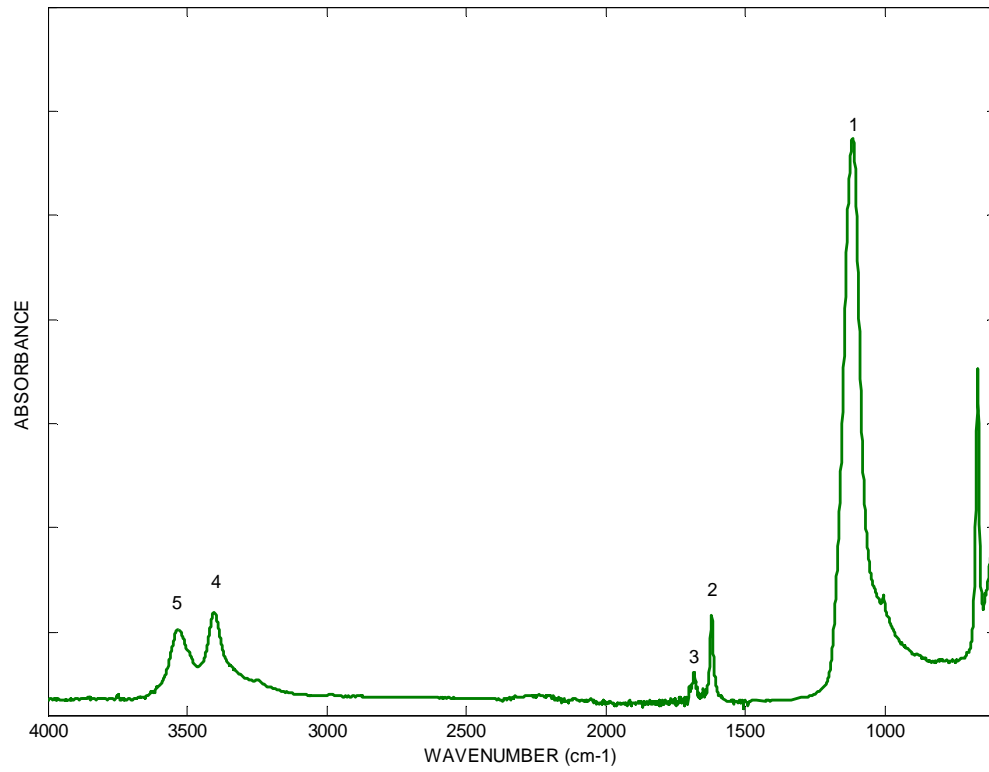

**Figure.** Spectral Fingerprint of sample. Each spectral fingerprint is generated from 34,010 data points. The data points are used to determine spectral congruency with known chinese drywall reference materials. Please note that the above figure is a condensed graphical representation of the averaged data scans and not intended for intersample comparisons.

## Reference Spectra

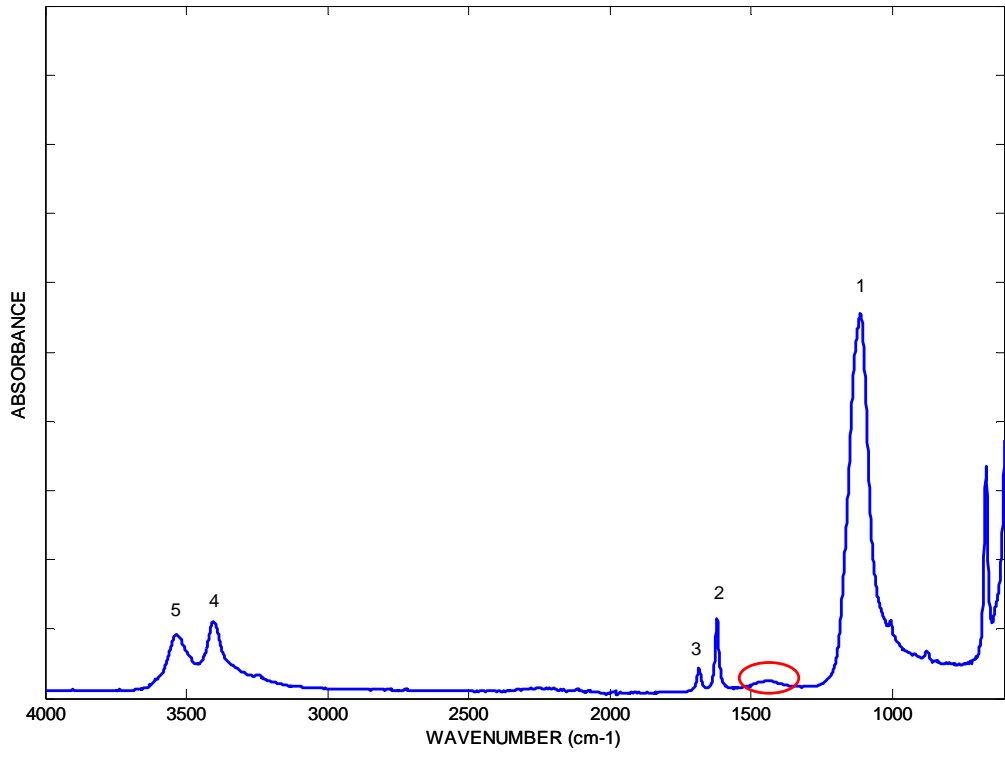

Gypsum (Calcium Sulfate)

American Drywall Reference Material

Type I Chinese Drywall Reference Material

Type II Chinese Drywall Reference Material
