\*Same day and 24 hour rush available at an additional fee. qPCR DNA analysis is not covered under any laboratory accreditations or approvals. Standard panel will quantify *Legionella pneumophila* and *Legionella species*. Additional assays available upon request (*Legionella pneumophila* sg. 1, *L. bozemanae*, *L. dumoffii*, *L. feelei*, *L. longbeachae*, and *L. micdadei*). \*\*Additional analysis performed on culture samples only and are not covered under any laboratory accreditation. Latex agglutination test will classify *Legionella* isolates as *L. pneumophila* serogroup 1, *L. pneumophila* serogroup 2-14, and non-*pneumophila* *Legionella* species. PCR identification identifies (when possible) the isolate to species using the mip gene (Macrophage Infectivity Potentiator).
